Adam Gordon

Junior FullStack Engineer

(Node JS/React/Tailwind/PostgreSQL Eco System)

Professional Summary

Versatile full-stack engineer focused on shipping end-to-end solutions for enterprise and indie product ideas. Well versed in modern tools and evolving with the advancement of AI integrations. Typically stack agnostic but most of the projects are done with TypeScript, Next.JS, with a Postgres Backend and hosted on Vercel. Rapid prototyper with product sensibility from sales background. Focused on bringing bold ideas to life and using lived experiences and user feedback to deliver feasible solutions to problems. Looking for opportunities to bring creativity, resilience, and results either remotely or on-site.

Current - Freelance Software Engineer

Present Day

- Currently working on an application with Bolt.new, to build a better Guitar/Music Theory training app, to combine groups of relevant but unclear information on the subject in order to further my understanding of both the tool, and the concept.
- In talks with some potential clients about building both projects personal to them, as well as entrepreneurial avenues to potentially go down.
- Leveraging my combined knowledge bases to adapt to the new paradigm we live in, and keep up to date on new libraries, methodologies, AI, etc.

Project Manager / Head Programmer

Mantis Wrestling 10/2024-07/2025

- Designed, prototyped, and coded the website for a martial arts trainer to organize his coaching business and accept payments online, incentivize new clients with deals for memberships, and helped coordinate business and marketing strategies for maximum utility.
- Worked closely to provide both business related and tech related guidance to bring product to launch relatively quickly, adapting to new conditions on the fly. Resulted in exponential month over month client growth from Q1-Q2 2025

Full-Stack Engineer

JavaScript Mastery 02/2024-07/2024

- Architected and built a comprehensive social media site that enables developers to collaborate, schedule meetups, record podcasts, and play them while browsing through posts in topical groups.
- Using NextJS, Prisma ORM, Supabase, Clerk for authentication, Tailwind, and ShadCN for styling, completed the project ahead of schedule working in a small team.

DevToday

04/2024 - 07/2024

- Architected and built a comprehensive social media site that enables developers to collaborate, schedule meetups, record podcasts, and play them while browsing through posts in topical groups.
- Using NextJS, Prisma ORM, Supabase, Clerk for authentication, Tailwind, and ShadCN for styling, completed the project ahead of schedule working in a small team.

GitNote

02/2024 - 04/2024

- Built a personal productivity tool to capture workflows, components, and knowledge accrued on my development journey.
- Integrated OAuth with NextAuth for easy authentication flow, used dynamic routing to provide a user experience that makes collecting knowledge easy and enjoyable, and allows for easy tracking of progress.

Full-Stack Developer

Diam International 06/2022-12/2022

- Built a new authentication system, to extend customers to access business data, enhancing security and user access.
- Programmatically configure time tracking software, improving payroll process efficiency, and productivity of team members.
- Independently maintained the company database and server, ensuring continuous and reliable service.

Project Manager / Web Developer Lead Intern

Cowan Consulting LLC 01/2022 –01/2023

- Refactored an incomplete vanilla JS project into a React Application, enhancing code quality and scalability.
- Trained and supervised 8-10 interns, fostering a collaborative learning environment and ensuring successful project handover.
- Took initiative to ensure new team members were adequately trained, improving overall project execution and continuity.

Education

- **BSc – Computer Programming and Information Systems** SUNY Farmingdale, NY Fall 2019 – Summer 2022

Technologies, Languages, Soft Skills/Attributes

- Programming Languages – Typescript/JavaScript, SQL, PHP, C#
- Front End Development – React, NextJS, Tailwind CSS, ShadCN, Vue2+3
- Back End – PostgreSQL, Prisma ORM, Supabase, Vercel, LAMP Stack
- Tools and Frameworks - NextJS, Laravel, Bolt.New, Postman, Github Copilot,
- Soft Skills – Leadership, Problem-Solving, Communication, Self Awareness, Humility, Team Oriented, Ambition
